PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments		
Optional/General comments	<p>Some observations: was the plant material used sown using technical recommendations for the crop? Has any pest and disease control been carried out on the crop? What is the spacing used in planting plant material? Why was bacterial inoculation performed 55 days after transplantation? And why was the assessment carried out 15 days later? Is it related to the manifestation of the disease? Has any statistical test been performed?</p> <p>In the results there is a repetition of the applied methodology. This got a little repetitive. It would be better to list this topic together with the methodology. How was the susceptibility test mentioned?</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
