### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>The article analyzes the influence attributed to the Krishi Vigyan Kendras organization and different socio-economic characteristics of the community for the adoption of climate-resilient technologies.</p> <p>The abstract should include information about the data source and the analysis procedure.</p> <p>In the introductory chapter, both the problem under investigation and the objectives are clearly stated.</p> <p>The methodology used for the analysis is simple but effective.</p> <p>The results present the information produced in an orderly and logical manner. Also, the proposed explanations are logical and have statistical support.</p> <p>It is suggested to unify Figures 1, 2, 3 and 4 as Figure 1 A, B, C, and D. Also, the order of evaluated technologies should be the same as that used in Table 3.</p> <p>Conclusions are closely related with the results analyzed.</p>	
<b>Minor</b> REVISION comments	<p>Some minor suggestions have been added to the manuscript with the track changes function.</p>	
<b>Optional/General</b> comments	<p>The work supports the task of the Krishi Vigyan Kendras organization in its role of promoting and directly and indirectly transferring different climate resilience technologies. I believe that the article has sufficient merits to recommend its publication.</p>
