

Review Form 1.6

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_77587
Title of the Manuscript:	Genetic variability studies for yield and yield contributing traits in rabi sorghum (<i>Sorghum bicolor</i> L. Moench) in relation to drought tolerance
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>This study was conducted to look the genetic variability for yield and yield contributing traits in rabi sorghum in relation to drought tolerance. It seems that the study was realized in one season and one location. The objective was not well defined. For quantitative traits study, we need more reliable data or information since quantitative traits are subject to environmental conditions. Appropriated format is need to fit trial objective, variety x agronomic practices x environments are very informative tools. Considering the type of information requested for the study, one needs to have more reliable data though number of seasons, locations or both. This article needs a serious major revision. I recommend that it can be again review for more improvement with a second year of data and other necessary traits that should be included as related to drought.</p>	
Minor REVISION comments		
Optional/General comments
