### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p>1. There is no mention of the importance of iron and zinc in plant development, reproduction, or reproductivity in the introduction section. Furthermore, it is unclear why you did your experiment in the new alluvial zone. As a result, I believe the goal of this experiment is not clearly stated in your introduction section.</p> <p>2. Please include details on the design of experiment, replication, statistical analysis, total area of the experiment, and any other pertinent information in the materials and methods section.</p> <p>3. There is no lettering on table 2-7 based on the statistical analysis. In any agricultural field experiment, statistical analysis is required to create a meaningful difference between treatments.</p>	
<b>Minor</b> REVISION comments	<p>1. Please try to make the discussion as a biological story based on the findings of your experiment.</p>	
<b>Optional/General</b> comments
