<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments	<p>The paper "Impact of Climate Change on Arid Region: Case Study of Rajasthan" is very interesting and its issues are in line with the focus of the journal. The paper is well written and has a sufficient length and a suitable arrangement. References are current and sufficient.</p> <p>The shortcomings are mainly of a formal nature:</p> <ol style="list-style-type: none"><li>1. The conclusion is too poor regarding the interest content; the conclusion must be rewritten. Because of the conclusion, summarize everything you have already written. Emphasize the most important findings from your study and restate why they matter. State what you learned and end with the most important thing you want the reader to take away from the paper. From the conclusion, a reader should be able to understand the gist of your whole study, including your results and their significance.</li><li>2. Some references are not cited carefully, for example:<ul style="list-style-type: none"><li>• Reference 1 is a collective book where authors " Vijai Shanker Singh, Deep Narayan Pandey, Anil K. Gupta and N. H. Ravindranath " are not listed</li><li>• Reference 2 is a newspaper article the main author "Bishwanath Ghosh » is not listed as the link of the paper has changed</li></ul></li></ol> <p>Please verify the references and write them a correct style.</p>
