**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<ul style="list-style-type: none"> <li>• The abstract is too long with a lot of unnecessary and unwanted materials.</li> <li>• Abstract should be devoid of the use of Firstly, Secondly, Thirdly and Finally.</li> <li>• Summarize the findings, recommendation and conclusion.</li> <li>• The introduction is full of cut and paste without proper linkage with the subject matter.</li> <li>• The author did not define landscape degradation or explain it for a better understanding of the research area and or, focus.</li> <li>• The primary area of study here is Cameroon, and Cameroon was not properly introduced in the introduction or in any part of this work. The author probably assumed that everyone reading this work knows that Cameroon is in West Africa and for such work, dealing with landscape and weather, the orientation of Cameroon will be necessary especially, where landscaping deals with sun and raining seasons. It's a major concern and needs to be addressed.</li> <li>• The rest of the work is superbly handled except that this work should have recommendations and very important for a paper of the type</li> </ul>
