Compulsory REVISION comments	The authors must develop the abstract section as follow Problem, Objectives, Methods, Main Results, Main Recommendation. I suggest the Authors: This paper seems to be covering a very interesting topic, investigating the Response of popular varieties on foliar application of micronutrients on growth, seed yield and quality in greengram . While the topic is potentially interesting, I found this paper nearly challenging to read because the language was particularly difficult. Many sentences seemed to try to smash together 3 or 4 ideas into a single, awkward sentence that used a variety of clauses to try to link the ideas. I found myself having to reread nearly every sentence to extract meaning. The authors must add the recommendation to help the researchers in this filed.	
Minor REVISION comments		
Optional/General comments
