Compulsory REVISION comments	<ol style="list-style-type: none"> 1. Eighteen yield contributing traits are mentioned in Abstract but only 05 mentioned and analysed. Suggested to redo analysis with all the traits so that residual value can be reduced and meaningful results can be obtained. 2. Introduction should be modified with incorporation of progress/ literature review on development of drought tolerant varieties of bajra. If no studies have been conducted before then same should be mentioned. 3. GPS location of the place of study area should be mentioned in Material and methods. 4. Varieties considered in the study should be mentioned in Material and methods 5. The results for correlation both genotypic and phenotypic should be deciphered correctly. 6. The results path correlation analysis should be deciphered correctly. 7. The discussion should be elaborated and modified accordingly. 8. References in text and at the back should be matched and corrected. 9. Check formats of the references according to the journal. <p>ALL THE CORRECTIONS MADE IN THE MANUSCRIPT SHOULD BE THOUGHLY INCORPORATED BY TRACKING THE CHANGES.</p>
