### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	1. Abstract. The purpose of this study has not been clearly described as whether this study is related to the environment and climate change. 2. I would suggest making a list of abbreviations. 3. Material and methods. An unusual formulation was found in the material and methods: 5% seaweed at 30, 50, 70 DAS/ha. It should be explained how many litres or grams of 5% seaweed are applied at 30, 50, and 70 DAS. 4. Result and discussions: To confirm the results, ANOVA analysis should be presented to see the multiple comparisons. The discussion then can be made, as to why the growth parameter increases in treatment but not in other treatments	
<b>Minor</b> REVISION comments	I would suggest to Check the english using Grammarly	
<b>Optional/General</b> comments
