

Review Form 1.6

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_87065
Title of the Manuscript:	Biofortification of rice to augment iron availability for better health of population
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	Value for biofortification is the procedure of increasing the concentration of certain micronutrients in the edible part of crop plants by application of mineral fertilizers or through conventional breeding methods to develop varieties with higher amount of micronutrients. However needs analysis grain of varieties .	
Optional/General comments	Good method. however, it is necessary to supplement the accumulated iron amount of the variety before the test or experiment . It is necessary to study and an alyze the accumulation of iron on the grain of rice (rice) to be more complete. Since the last variety served for functional products is the rice variety with a lot of iron served to children and women.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
