

## Review Form 1.6

Journal Name:	<a href="#">International Journal of Environment and Climate Change</a>
Manuscript Number:	Ms_IJECC_88599
Title of the Manuscript:	COMPARATIVE ANALYSIS OF AEROSOL OPTICAL PROPERTIES OVER HIGH ALTITUDE REGION OF WESTERN GHATS IN SOUTHERN INDIA
Type of the Article	Original Research Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijecc.com/index.php/IJECC/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	Please, review the references numbers. It is from [1] to [8] but suddenly jump to [22] [23]  The phrases: "Higher AOD occurred during premonsoon ( $1.1 \pm 0.02$ in 2018 and $0.61 \pm 0.002$ in 2021) due to the occurrence of fine aerosol particles" is dubious. Did you mean the maximum relative increase or the largest values? "SSA increases with the increase in wavelength and it was found to be higher in winter compared to pre monsoon" – in January, for all frequencies, SSA is the lowest value in 2018 and the highest in 2021. Why? Same to ASY	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
