PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	This is well intended research and good effort. However, we have made some remarks and observations. 1. Abstract and introduction sections need the aim of the study 2. Materials & methods section is poorly structured and needs more details. What is the plot size? What is the plant density? What is about the control? How each parameter is taken on plants? What is the kinds of plant which are chosen for taking agronomic parameters? What statistical analysis you did? It is not explained into the materials and method section. What is about the economical aspect in the methodology? 3. Result and discussion section is poorly structured Results were not discussed	
Minor REVISION comments	Grammatical errors need to be fixed. Other comments were made in the text.	
Optional/General comments
