

Review Form 1.6

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_89521
Title of the Manuscript:	Influence of microplastics on seedling growth of blackgram under different soil types
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijecc.com/index.php/IJECC/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The paper is a report on a field experiment. The pro is the identification of the experiment site by coordinates obviously of Google Earth but coordinates (Latitude and Longitude are to be given in Degree, minutes and seconds, not in the decimal system. It would be wisely to focus on the negative effect of the contaminated microplastic on the plant's development of chlorophyl and to find out why that happened. The statistical formula should be given. Jargon should be avoided as far as possible. Sterilization by microwaves: It seems as if a common microwave oven was used. The KW of radiation should be given of that specific oven. Sterilized vessels – by what?	
Minor REVISION comments	No further comments	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
