PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>As Title I suggest: Phytoremediation an alternative to detoxify organic and inorganic toxins from soil and water</p> <p>Abstract is ok.</p> <p>In the introduction I suggest: a). Make the wording clearer and more precise, with special attention to the syntax, in order not to generate confusion in the reader. b). Use appropriate connectors so ideas are clear. Use the connectors of contrast, firming, emphasis, order, and time.</p> <p>In the Materials and Methods section: a). It must strictly mention the experimental technique used: experimental design and/or model, mean comparison tests, and forms of evaluation.</p> <p>In the Results and Discussion section. a). I suggest avoiding writing it as if it were the Materials and Methods section. b). According to the author's guide of the journal, there is a great area of opportunity to interpret and discuss the results since they do NOT appear in the writing or they are very poor.</p>	
Minor REVISION comments	<p>According to the journal's author guide: Tables and figures must be placed within the text. Tables and figures must be presented according to their appearance in the text. It is suggested that the discussion of tables and figures appear in the text before the appearance of the respective tables and figures. No tables or figures should be given without discussion or reference within the text.</p> <p>Nomenclature and Units: Internationally accepted rules and the International System of Units (SI) must be used. If other units are mentioned, indicate their equivalent in SI. Reference to a magazine: Note: The use of the DOI number is recommended for the full text article. (if available).</p>	
Optional/General comments	In the revised article, you will see some of my minor corrections (in bold), along with some suggestions
