PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>Instead of the hyperlink (www.indiastat.com, 2019-20) cited in the text, it would be better to put (INDIANSTS, 2019-2020) and place the rest of the information in the bibliography.</p> <p>In the methodology it would be interesting to explain which software was used to analyses the data. It could even better explain the method used to build the clusters as stated in the figure "Tocher method" which is mentioned in the objective but does not appear in the explanation of the methodology which should be the place where the methodology should be better explained.</p> <p>In my view, tables are frames because they have all the lines and are completely closed, so I suggest changing the names to frames instead of tables or changing the formatting to a table format that would only have the horizontal lines of the header and the final line highlighted.</p>	
Optional/General comments
