

## Review Form 1.6

Journal Name:	<a href="#">International Journal of Environment and Climate Change</a>
Manuscript Number:	Ms_IJECC_90233
Title of the Manuscript:	Effect of varied phases of lunar on the growth and yield parameters of rice varieties
Type of the Article	

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

<b>Compulsory</b> REVISION comments		
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments	<ol style="list-style-type: none"><li>1. It is appreciable that authors have designed the research study on one of the essential themes – Food security.</li><li>2. The objective of assessing the growth and yield parameters of rice under the lens of lunar phase (Biodynamical domain of Astrometeorology) is different and concrete.</li><li>3. Appropriate experimental protocol - Factorial Randomized Block Design (FRBD) has been followed and the introduction part is well structured.</li><li>4. Sufficient results were generated to publish in the way of research paper.</li></ol> <p><b>Future directions:</b></p> <ol style="list-style-type: none"><li>5. Authors are advised to test the idea of lunar phase on wheat and other cereal types, so that it may generate knowledge which aids in our understanding on the impact of lunar phase on different cereals.</li><li>6. Study of underlying molecular mechanisms in response to lunar phases may be considered for advanced research study.</li></ol>
