PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>- In general, the work is good but the author didn't confirm the presence of polycythaemia vera by measurement of erythropoietin level or detection of JAK2 V617F mutation, he only depend on hematological findings and patient's family history and these are not enough to confirm the diagnosis of P.V., so the title should be changed to be "A case of Budd-Chiari Syndrome associated with erythrocytosis and homozygous MTHFR C677T mutation", and accordingly all the sections of the manuscript should be reviewed and corrected.</p>	
Minor REVISION comments	<p>- The language of the overall manuscript should be improved, particularly the abstract and clinical case study</p> <p>- The results of computed topography (CT) scan should be summarised in a paragraph not in points.</p>	
Optional/General comments
