

**Review Form 1.6**

Journal Name:	<a href="#">International Journal of Medical and Pharmaceutical Case Reports</a>
Manuscript Number:	Ms_IJMPCR_80654
Title of the Manuscript:	Inadvertent intravenous administration of an oral preparation of Ibuprofen
Type of the Article	Case study

**General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijmpcr.com/index.php/IJMPCR/editorial-policy> )

**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b><u>Compulsory</u></b> REVISION comments		
<b><u>Minor</u></b> REVISION comments	<p><b>The study topic is an interesting and important issue to be discussed.</b></p> <p>- the modifications highlighted yellow e.g. (word), added word highlighted green e.g. (word),</p> <p><b>Abstract is too long</b> and missing keywords. <b>Add these keywords</b></p> <p>Before discussion you need to <b>add ethical considerations</b> for your case,</p>	
<b><u>Optional/General</u></b> comments	<p>I'm surprised such medication error can happen! Because it is fatal and rarely to found. Also, all nurses who must be in contact with patients especially children (pediatric patients) are well trained and highly qualified. So, if this error is discovered, it must be handled sufficiently by scientific research.</p> <p>Introduction s too short more details are need to strengthen your case study.</p> <p>This is a fatal mistake and need more details about the case herself. And if there is follow up?</p>
