PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<p>Compulsory REVISION comments</p>	<p>1/Abstract must be written in this form:</p> <p>Introduction: Brucellosis in human is an uncommon disease in Libya and usually diagnosed by serological assays. The clinical symptoms of this disease are none specific which makes differential diagnosis difficult.</p> <p>Presentation of Case : is too long</p> <p>Discussion : Author did not summarize discussion</p> <p>Conclusion : What does the clinical case study bring to the medical literature?</p> <p>2/ Introduction : Age does not show the particularity of the clinical case because many studies have shown that brucellosis affects all age categories. In my opinion The importance of this case report is the difficult differential diagnosis</p> <p>3/ Case report:</p> <ul style="list-style-type: none"> • the author must put the values of the haemogram in the paragraphe that allowed him to determine leukemia in the paragraphe • Author must determine CBC abbreviation, • the parameters values of (CRP, Procalcitonin, LDH...) must be put in the paragraphe • Not complete sentence: Alanine aminotransferase (ALT) was slightly raised while vitamin B12 (VIT. B12) • Author have to put the biopsy's photo • The usual values must be entered in the table (1 and 3) <p>4/ Discussion:</p> <ul style="list-style-type: none"> • I think that the text starting with "Mucosa of oral cavity " and ending with "up to 50 days " must be removed because paragraphs explains the immunological mechanism that leads to lymphadenopathy, while the patient does not show this clinical sign • Presence of many repeated paragraphs • Laboratory investigation marked increase in LDH, AST.....Author should discuss the results of the biochemical parameters • (Ref. ASM 2016). What does this mean? • Author has not conducted a statistical study to say that No statistical difference has been found with respect to the form of combination therapy on the initial clinical response of human brucellosis. Remove this paragraphe <p>Conclusion: remove this paragraphe: Very limited attention has been given to the oral cavity as being the first point of interaction between the body and Brucella. Since. Start the</p>	

Comment [UW1]: not complete sentence
