Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>ISOLATION OF <i>LISTERIA MONOCYTOGENES</i> FROM RAW MEAT SOLD IN NASARAWA STATE <i>Listeria monocytogenes</i> is an infectious disease of humans and animals- Rather should be <i>Listeria monocytogenes</i> is the cause of Listeriosis, an infectious disease of</p> <p>All <i>Listeria monocytogenes</i> should be italicized</p> <p>Large Increased prevalence of food-borne outbreaks of listeriosis have occurred during the last decade in Europe and USA. Between 1991 and 2002, 19 outbreaks of invasive listeriosis were reported in nine (9) European countries, with total of 526 related cases. -THIS SHOULD BE REFERENCED</p> <p>In 1997, one large outbreak resulting in 1566 cases of listeria Gastro-enteritis was reported in Italy and traced to the consumption contaminated corn salad. RECAST and Referenced</p> <p>(food net) should be FoodNet</p> <p>MATERIALS – MATERIALS</p> <p>2.2 STUDY POPULATION- REPEATITOUS NOT NEEDED</p> <p>This consists of 60 meat samples collected from the 5 selected markets. The meat samples included 4 cow meat samples, 4 goat meat samples, and 4 chicken meat samples from each of the markets. This means that twelve meat samples of 3 meat types were collected from each market location.</p> <p>Enrichment method- This paragraph is not necessary since there was no report on how the agars were prepared nor is it important</p> <p>Results</p> <p>small Gram positive- Better description. What does small mean?</p> <p>It would have been good to know the bacterial load of the samples (raw) and processed</p> <p>Actually, Tables 1 and 2 can be combined</p> <p>Same for Tables 3 and 4</p> <p>References</p>
