

Review Form 1.6

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_83712
Title of the Manuscript:	The stability analysis for Bt cotton hybrids (MON531 and MON15985) using Additive Main Effects and Multiplicative Interaction for seed cotton yield.
Type of the Article	

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijpss.com/index.php/IJPSS/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The article meets all the requirements for scientific research. Given the predominance of synthetic fibers in the global textile industry, the topic is relevant. The introduction examines the problem in depth, but there is no clear aim of the study. I recommend the author (s) to specify the type of bollworm. Material and method accurately and completely describe the field experiment. The problem is whether one-year data can be considered reliable! The obtained results are discussed objectively. The detailed statistical analyzes performed are sufficient grounds for more in-depth future research. I recommend the author (s) in Table 1 to indicate the amount of precipitation during the cotton growing season, not the annual amount of precipitation.	
Minor REVISION comments	No	
Optional/General comments	No	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
