

Review Form 1.6

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_86459
Title of the Manuscript:	Estimation of general and specific combining ability effects for quality protein maize inbred lines
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijpss.com/index.php/IJPSS/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>INTRODUCTION This section is too lengthy. It should be succinctly written such that the background information with recent literatures only will be cited. To prevent loss of focus, author should review previous studies relevant to the present study and also highlight the gaps observed. The justification (s) for the study was not clearly mentioned and the objective of the study which is the concluding part of this section was clumsy.</p> <p>MATERIALS AND METHOD The sub sections for combining ability and its effects are too wordy. Most of the information provided were redundant. This has contributed to the unnecessary high page number of this manuscript.</p> <p>RESULTS AND DISCUSSION To make this section concise, I will suggest that only results across the three locations should be presented and discussed. Presenting results for each location explicitly may not add value to the study considering the objective (s) of the study. This section is also too lengthy, making it difficult to comprehend.</p>	
Minor REVISION comments	I have used track changes to make corrections on the manuscript.	
Optional/General comments	The scientific name for maize should only be italicized and not underlined in print. (check Abstract section of the manuscript).	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
