

## Review Form 1.6

Journal Name:	<a href="#">International Journal of Plant &amp; Soil Science</a>
Manuscript Number:	Ms_IJPSS_86712
Title of the Manuscript:	Potash Releasing Bacteria for unlocking soil potassium- A way forward for judicious use of chemical fertilizers
Type of the Article	Review Article

### **General guideline for Peer Review process:**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijpss.com/index.php/IJPSS/editorial-policy> )

### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	The phosphate-solubilizing bacteria assist in the re-emergence of phosphate in soil Plants are able to grow and develop with the help of genetically modified bacteria Micrococcus, Bacillus, and pseudomonas are the most effective biofertilizers and phosphate solubilizers (organic / inorganic) Phosphate solubilizing bacteria in natural fertilizers recycle P naturally. Use biofertilizers rather than chemical fertilizers. Sometimes they may cause soil infertility.	
<b>Minor</b> REVISION comments	Check alignment (Times New Roman /12)	
<b>Optional/General</b> comments		

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<u>(If yes, Kindly please write down the ethical issues here in details)</u>	

### **Reviewer Details:**
