PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The paper aimed at evaluating soil physical properties of various fields of Agricultural Research Station in Ummédganj-Kota. Dataset appears to be sufficient enough to achieve the main objective of the study. The paper is of interest but lacks, in my opinion, a clear description of research problem being addressed and why those particular physical properties were considered. In addition to this, it would very interesting to point out on previous relevant studies carried out in the study area and their associated shortcomings. Most importantly, English expressions need to be improved; and the conclusion section needs to be reframed.	
Minor REVISION comments	The minor comments and suggested changes can be found in the attached report.	
Optional/General comments
