### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	This article is interesting and investigates how levels of potato production change with different varieties and locations. I feel the author has not fully explained the results. For example, in Table 1, the highest and lowest levels of production were not mentioned. Are these scenarios accidental or repeatable in the practical field production in the future? Are there any statistics tests can be performed?	
<b>Minor</b> REVISION comments	None.	
<b>Optional/General</b> comments		

### **PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<u>(If yes, Kindly please write down the ethical issues here in details)</u>
