PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The goal is not included at the end of the introduction and it is not acceptable to include a title in the introduction, so I suggest merging the paragraph in the introduction Why did the researcher not do the statistical analysis of the table, especially since I see some non-significant differences in most of the results? I think a statistical analysis of the tables should be done.	
Minor REVISION comments	There are some grammatical errors that have been corrected in the highlight	
Optional/General comments
