

Review Form 1.6

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_88823
Title of the Manuscript:	Morphological and molecular characterization of <i>Colletotrichum gloeosporioides</i> causing mango anthracnose
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>My question is, how can one genus or species be isolated (<i>Colletotrichum gloeosporioides</i>) from a natural infection?</p> <p>My question is how to isolate one type of genus or species (<i>Colletotrichum gloeosporioides</i>) from natural injury?</p> <p>Based on your references (The production of mango affected by a large number of biotic constraints of which, diseases caused by fungal pathogens are the major yield limiting factor. Also, Mango anthracnose incited by several species of <i>Colletotrichum</i> including <i>Colletotrichum gloeosporioides</i>, <i>Colletotrichum acutatum</i>, <i>Colletotrichum kahawe</i>, <i>Colletotrichum asianum</i>, <i>Colletotrichum fructicola</i>, <i>Colletotrichum siamense</i> etc [13,14].) So that,</p> <p>This is an artificial infection, not a natural one.</p> <p>The note is to write sp. (with all <i>Colletotrichum sp.</i>) in regular or normal letters, not italic or latin.</p>	
Minor REVISION comments	<p>Acceptability of the paper</p> <p>This manuscript has been accepted</p> <p>I agree to publish this paper in your estimated journal after the authors making revision</p>	
Optional/General comments
