### **PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<b>The statistic need be reframed in Results. The comparison between all the observations and just one control is not correct. You should compare between treatments to compare of the same experiment to determine the best effect of the product, and then compare with the control. Other option is to compare the synergic effect of the compounds vs the best alone and the control. There is a table 2, but in text wasn't present. There are no descriptions of the statistics in text, there are so many figures and information without any mention. Its not clear if you only use the information of GA3, because NAA it's not present.</b>	
<b>Minor</b> REVISION comments	The English should be reviewed. You mentioned PGR but didn't describe it In Introduction there are lost biography In Abstract you dint mention the effects of NAA	
<b>Optional/General</b> comments
