### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	There are several manuscripts concerning in vitro multiplication of Gerbera and methods are well known. However in this work several hormonal combinations have been tested that could help achieve a faster propagation method. If the author (s) could include the name of (an existing?) cultivar, genotype, etc., this would improve the relevance of this paper.	
<b>Minor</b> REVISION comments	Text must be fully revised for details, i.e.: -In vitro or <i>In-vitro</i> ? ( only use one form) -days, not Days -Length -Revise/improve sentence: "propagation of gerbera [16] reported....." -Gerbera or gerbera? (only one form) -[3]. (dot) -Agar powder <u>brand</u> ? As other chemicals?	
<b>Optional/General</b> comments	I think it is well written, however, as indicated, many publication on Gerbera already exist	

### PART 2:
