

Review Form 1.6

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_89699
Title of the Manuscript:	Effect of foliar application of Nano-urea on yield attributes and yield of Pearl millet (<i>Pennisetum glaucum</i> L.)
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijpss.com/index.php/IJPSS/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	MATERIALS AND METHODS Most be content REFERENCES of work thus as 1. Available N was determined by 2 M KCl extraction, followed by steam distillation and acid titration (Keeney and Nelson, 1982). Extractable P was determined by double acid extraction (0.1N HCl and 0.025 N H ₂ SO ₄) followed by colorimetry as describe by (Mehlich et al.,1962) and followed by flame photometry for extractable K (Olsen and Sommers, 1982). The soil pH was measured using pH meter (Fisher Accument). 2. The texture of experiment soil is sandy clay loam how ? where the soil partiales distribution ? 3. Nano-urea ? source of it's and the size of partiales of it ? or how prepared urea nano ?	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
