PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	The original manuscript is interesting, it does not have many patients to compare; however, it is an interesting clinical analysis of the Nigerian female population with risk of spontaneous abortion and probable autoimmune and haematological diseases.	
Minor REVISION comments	The group is small and divided in many different subgroups by age. It is recommended to decrease the age span for 10 years in order to do a better statistical analysis. Table 1b is interesting although the differences in demographic index is difficult to analyse in most cases. Are there any other studies of the frequency of autoimmune disease in those populations?	
Optional/General comments	The manuscript is interesting although the presentation of the data may be enhanced as well as the discussion	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
