

Review Form 1.6

Journal Name:	International Journal of Research and Reports in Hematology
Manuscript Number:	Ms_IJR2H_89337
Title of the Manuscript:	Autoimmune Hemolytic Anemia in Children: Diagnostic Approach and Management
Type of the Article	Review Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijr2h.com/index.php/IJR2H/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<u>Compulsory</u> REVISION comments	<p>The manuscript contained a low-quality prose, data, weak arguments, and conclusions with vague phrases and typographical errors. There was no scope of study, and the specific area of research was not stated, no review of related literature, no methodology, and no discussion of findings (meaning there was no finding). Hence, there was no contribution to knowledge . The work should be revisited and should be in sequence with the features of an article for publication. I further recommend that to achieve the required depth for this kind of research, more review of contemporary literature on the subject should be done and more references should be added. Kindly see below some specific concerns on the manuscript:</p> <p>The abstract on the manuscript does not contain the characteristics of an abstract. It is a repetition of the introduction; hence, the author should review the abstract. The author mentioned that the manuscript is a review article – is he/she reviewing another research on the subject area or another author's work? If not kindly rephrase.</p> <p>Kindly review the classification of hemolytic anemia – Do you mean the causes or are you referring to the classification? The items stated refers to the causes. Kindly review and rephrase accordingly.</p> <p>In the section “evaluation of suspected immune hemolytic anemia” kindly state what was being evaluated (for eg. Number of patients with the ailment that visited a particular hospital over a particular period)</p>	
<u>Minor</u> REVISION comments		
<u>Optional/General</u> comments		

Review Form 1.6

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	
If plagiarism is suspected, <u>please provide related proofs or web links.</u>	The entire work lacked sufficient intext citations.
