### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<p><b>1. In the case presentation session:</b>            1.1 - The authors could further detail the patient's medical history in the first two paragraphs (Photo of the medications, tables of laboratory results, computed tomography of the lungs, etc.). Because all these factors serve as factors in an attempt to explain the appearance of the ulcerous lesion.            1.2 - If scraping was performed on the lesion ("scrapable whitish plaque"), is there a histopathological result? If so, it is necessary to include details of the injury.</p> <p><b>2. In the discussion session, the authors must quote the bibliographic references according to the formatting guidelines of the journal in question.</b></p>	
<b>Minor</b> REVISION comments	<p>The authors could further detail the case report to better characterize the lesion and the factors that could lead to the appearance of the lesion in question.</p> <p>In the discussion session, some cases of similar lesions could be covered in an attempt to compare and possible predisposing factors.</p>	
<b>Optional/General</b> comments	<p>The present study proved to be a relevant issue in the current reality of the health area, thus providing a gateway for several future investigations.</p>
