Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The manuscript title and abstract are adequate.</p> <p>Introduction section. Adequate</p> <p>Material and methods section. It is necessary to eliminate subsection 2.5. The information in this subsection could be helpful to complete the other subsections. In the ethical consideration subsection, put the number of the agreement of the Ethics Committee that reviewed the investigation protocol.</p> <p>Result section. There is much information that is not supported in the tables. It is necessary better the result descripción.</p> <p>Discussion section. There many information that is not useful for discussion. It is necessary better this.</p> <p>Tables section. Various problems need to be corrected.</p> <p>Figure section. Adequate</p> <p>References section. Many mistakes in the descripción of references. It is necessary to carry out a good review. Also, is necessary the actualization of information. Only a 2015 reference is described and two of 2014. There is information actualized in this area; for example</p> <p>Wilson R. HPV vaccine acceptance in West Africa: A systematic literature review. Vaccine. 2021;39(37):5277-5284. doi: 10.1016/j.vaccine.2021.06.074.</p> <p>Bélec L, Nodjikoombaye ZA, Adawaye C, Mboumba Bouassa RS, Sadjoli D. A systematic review of self-sampling for HPV testing in Africa. Int J Gynaecol Obstet. 2020;149(2):123-129. doi: 10.1002/ijgo.13112.</p>	
Minor REVISION comments		
Optional/General comments	This manuscript has many grammatical errors, and proofreading by an English-speaker native is necessary.	

PART 2:
