General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<http://peerreviewcentral.com/page/manuscript-withdrawal-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	Author should proffer possible reasons for the difference observed in prevalence by microscopy and RDT diagnosis	
Minor REVISION comments	Please see attached track changes in body of manuscript. Study is a cross-sectional study	
Optional/General comments	The author should have peers review for fluency, coherence and consistency in tenses	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i> Although the investigators have an ethical review approval to conduct the study, venupuncture to get two (2) mL of blood was unnecessary to perform malaria microscopy. Pinprick blood sample is adequate for the procedure in future.
