Review Form 1.6

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>The Thema from Authors is good chosen, while problematic of helath hygiene police particulary in low-income countries is from great intersts, particulary for schooled and teenaged children. The length of full text is ca 2864 words.</p> <p>Abstract need to be little bit better structured. My advice is to bigin with sentens. Aim: the objective of this study is to asses.....Nigeria, to transmitted the first sentence soil transmitted helminths to text introduction.Insted of Methods, written Methodolgy , and To add in methodology:place and type of the study(cross-sectional , the duration exists in abstract).in conclusion, instead of we advocate, can we said we advice to... . In conclusion little bit underline the importance of better hygiene police and adequate measures to prevent ora-fekal infections in schollchildren for healthier status of school and teenage children.</p> <p>In introduction can suggested some new up-to date until 5 years references, is relative good written, but in methodology is nedde to stay thanin Ethical aprovemnet sentence "All authors hereby declare that all experiments have been examined and approved by the appropriate ethics committee and have therefore been performed in accordance with the ethical standards laid down in the 1964 Declaration of Helsinki."</p> <p>Results in table need to be little bit corrected in regarding of p value: The <i>P</i> value should be expressed to 2 digits whether or not it is significant, Do not use 0 before the decimal point for statistical values <i>P</i>, alpha, and beta because they cannot equal 1, <i>P</i> is always italicized and capitalized. Correct expression: (<i>P</i> = .05). Wrong Expression: (<i>P</i> < .05). Discussion is rel good written.Conclusion is good written wth accent of limitation of the study procceding, only to add and underline preventive measurements for amiglioration of hygiene practice for better hygiene police in scholl aged children forimprovement of helath status. Advice to add in text Acknowlegments, Authors Contribution</p> <p>Reference: only 7 ref. are up to date in ultimate 5 years, other are older. References need to be better structured, for example ref nr 20,26,27,28 need to transfer the year to end .</p> <ol style="list-style-type: none"> 1. For example error; Sabah AA, Gneidy MR, Saleh NM (2015) Prevalence of Helicobacter pylori infection among adult patients with different gastrointestinal parasites in Tanta City district. J Egypt Soc Parasitol 45:101–106 *error <p>Better sugg Sabah AA, Gneidy MR, Saleh NM. Prevalence of Helicobacter pylori infection among adult patients with different gastrointestinal parasites in Tanta City district. J Egypt Soc Parasitol.2015; 45:101–106.</p> <p>Please slow reading the reference and corrected and upt date some of them. Suggestions to add some new up-to date references, for example: Effect of Helicobacter Pylori Infection on Nutritional Status in Polish Teenagers Anna Szaflarska-Poplawska, Anetta Soroczyńska-Wrzyszcz Gastroenterol Res Pract. 2021; 2021: 6678687.
