Manuscript Number:	Ms_IJTDH_86329
Title of the Manuscript:	Meningococcal Meningitis in Sub-Saharan Africa: A Review
Type of the Article	Review Article

### General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalijtdh.com/index.php/IJTDH/editorial-policy> )

### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	First of all I want to commend the author(s) for a well written article. My comments are just on the minor section which I will include below	
<b>Minor</b> REVISION comments	In the Introduction section, Line 4 where it was stated that: " Several different bacteria can cause meningitis..... " I think we can recast it as: " Different bacteria can cause meningitis.... " The combination of several and different seems not to add up.  Still on Page 1, Introduction: second to the last line where the author(s) stated that: " However it would be prudent to mention here that penicillin is no longer effective...." I think we can say: " However it would be prudent to mention here that penicillin is no longer effective..."	
<b>Optional/General</b> comments	Its a scholarly article in all ramification, from the expression of idea to statistics and appropriate data representation. I believe with this few minor revision the academic community awaits a celebrated result in public health.	

### PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
