PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>First of all, I would like to appreciate your idea and effort.</p> <p>When I come to my comments: First, I want to recommend you to focus on different cases to a single type of cancer evolution and its therapy than highlighting different cancers as improper wound healing/ unhealed wounds is only single case to a cancer.</p> <p>If you want to go ahead with this idea you should give more emphasis on how different mechanisms of wound healing to cancers evolution and how these cancers can be treated, in other words the relationship between different mechanisms of wound healing to cancers evolution should be discussed.</p>	
Minor REVISION comments	As a viewpoint, it is better to refer more articles and summarize its findings of these articles about Cancer Evolution and Cancer Therapy than copying more ideas of a single article.	
Optional/General comments	The title is more recommended to a new research than a view point	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
