

Review Form 1.6

Journal Name:	International Research Journal of Pure and Applied Chemistry
Manuscript Number:	Ms_IRJPAC_89514
Title of the Manuscript:	Processing Techniques affects the Vitamin Quality of Edible Insects – Potential for Use in Complementary Foods
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journalirjpac.com/index.php/IRJPAC/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>In the methodology, the author should be more specific on the pressure applied (quantity, magnitude) during defatting to enable reproducibility.</p> <p>The author's discussion was not making inferences or attributions to these processing techniques as the might perhaps make the results of one sample differ from the other. For example: if a sun dried sample has a relatively low Vit. C, basically it could be attributed to the intensity/period of exposure to sunlight or if fat soluble vitamins are relatively low, it could be attributed to defatting as a processing technique as most of these vitamins could be leached into the oil during defatting.</p>	
Optional/General comments	<p>It is a well written paper, results were clearly stated, compared amongst samples and with results from literatures.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
