### PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	Not revealed	
<b>Minor</b> REVISION comments	Not revealed	
<b>Optional/General</b> comments	Article's subject is the nature of light effect on cabbage yields. The study was conducted to evaluate Brassica rapa and Brassica oleracea productivity under shade nets in coastal environments. According to the results, the use of black shading netting reduced maximum air temperature with increasing shading intensity. It is worth noting that the authors have given the results on growth, yield, quality, chlorophyll content parameters, but have not indicated chemical changes in the composition of cabbage bob, physico-chemical, organoleptic indicators, harmful chemicals content and safety indicators. Despite these suggestions for consideration, the article is well structured, written in clear and understandable scientific language, the conclusions are logical, the literature corresponds to the stated topic. Presented comment does not intend to diminish the scientific and practical value of the presented work and is recommended for publication.
