**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	<ol style="list-style-type: none"> <li>1. No specific details of side effects are reported, and authors didn't report the underlying health issues or age group in which side effects were reported.</li> <li>2. As per the author, 8439 individual had side effects from more than million doses and 52 had moderate to serious side effects – authors should consider using the side effect in terms of percentage or per thousand instead of using whole number which could lead to vaccine resistance and could be used as misinformation.</li> <li>3. Authors should reconsider the use of world “COVID-19 vaccines are celebrated for their role”</li> <li>4. Standardized and uniformed terminology should be used to refer to the virus “SARS-associated coronavirus (SARS-CoV)”</li> <li>5. Conclusions are only focussed on side effects of vaccine – However the title and objectives of the study are not only to assess the adverse side effects.</li> </ol> <p>Overall, it's a great topic to discuss as the world is struggling with pandemic but suggest major revisions.</p>	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments
