PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>1- Abstract should not include any reference. Therefore, Author must remove (NCBI GenBank, www.ncbi.nlm.nih.gov) from Abstract.</p> <p>2- References are relevant, referenced correctly, and included appropriate key studies. However, some referees are not recent such as Ref [2] ,[4], [5], [7], [8], [15], and Ref [16]. Therefore, I suggest replacing them with relevant as well as recent references.</p> <p>3- The process of the research methodology is not clear. Therefore, I suggest draw a work process or flow chart to explain the proposed work.</p> <p>4- it would be better to present the technical details of the research methodology in a table instead of text.</p> <p>5- The conclusion answers the aims of the study and is supported by results, but it is missing future work. Therefore, It would be better to inform future research opportunities.</p>
