PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<p>1. The time duration of sample collection is only 4 months, why not all the year round for better reasons identification.</p> <p>2. Why you given importance on 20-29 age group patients though you showed the infraction rate is almost similar below and above the age range of 20-29 years patients</p> <p>3. The comparison of infarctions have no graphical presentation for better explanation.</p> <p>4. There are no details explanation about the data analysis management.</p> <p>5. No brief discussion on findings and tentative suggestion of precaution or preventing the situation.</p>	
Minor REVISION comments	<p>1. There are no sequence of reference number started with no.7 in manuscript rather to be started with 1 to onwards.</p> <p>2. There are some mistakes in written formate for clear understanding the matter.</p> <p>3. Title is very common and similar to many other published researchers articles.</p> <p>4. Aim and scope even prospect of the research findings should well mentioned.</p>	
Optional/General comments	<p>This type of investigation has been carried out for different areas or even same area's different Hospitals within short period of time that identified very less difference and concluded information, so I think the study period and patients variety should contain more range of informations</p> <p>The manuscript can be published after major revision.</p> <p>(A detail comment is placed in original manuscript)</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
