

Review Form 1.6

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_88715
Title of the Manuscript:	Modelling the impact of an effective mass media awareness campaigns on the spread of HPV infections
Type of the Article	Original Research Article

General guideline for Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guideline for Peer Review process, reviewers are requested to visit this link:

(<https://www.journaljamcs.com/index.php/JAMCS/editorial-policy>)

PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<ol style="list-style-type: none"> 1) The abstract of the paper should be short and effective. 2) The literature of the mathematical modeling of infectious diseases is very large. The authors should discuss it by giving some slandered references. I suggest the following papers to cite in the introduction section: <ol style="list-style-type: none"> i) Role of vaccination, the release of competitor snails, chlorination of water, and treatment controls on the transmission of bovine schistosomiasis disease: a mathematical study." Physica Scripta 97.7 (2022): 074006 ii) A new study on two different vaccinated fractional-order COVID-19 models via numerical algorithms." Journal of King Saud University-Science (2022): 101914. iii) Stability and bifurcation analysis of a fractional-order model of cell-to-cell spread of HIV-1 with a discrete time delay." Mathematical Methods in the Applied Sciences (2022). iv) A mathematical study of a Tuberculosis model with fractional derivatives." International Journal of Modeling, Simulation, and Scientific Computing (2021). v) A Malaria Model with Caputo-Fabrizio and Atangana-Baleanu Derivatives." International Journal of Modeling, Simulation, and Scientific Computing (2021). vi) A stochastic SIR model for analysis of testosterone suppression of CRH-stimulated cortisol in men." International Journal of Modeling, Simulation, and Scientific Computing (2021): 2250021 3) Check the grammatical mistakes and typos. 	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
