**PART 1: Review Comments**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Compulsory</b> REVISION comments	This is a good paper, with an interesting selection of methodology. I think the discussion needs to be revised to align with the title "pathogenic potential" to reveal that the results proved the pathogenicity of the microorganisms isolated in depth. With a good support of scientific evidence from other similar studies I encourage the writer to use that in comparison with this particular study.	
<b>Minor</b> REVISION comments		
<b>Optional/General</b> comments		

**PART 2:**

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
