PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none"> - There are several initials without the respectively meaning such as: NAFLD, BMI, CAP, LSM, TE, among others. Please perform adequations, since the readers need to know what the author are talking. - To better understanding of the inclusion and exclusion criteria, the reviewer suggests to the author to insert a diagram for a representation view, it will be easier for the authors to explain the criteria as well as for the readers to understand it. - Explain how the exams in the methods "C. Liver Stiffness and CAP Measurements Using Transient Elastography (FibroScan)." Were performed. - The reviewer found some text highlighted in red during the manuscript, and seems that is not the final version of the manuscript or suggest that it was not finished before submission. It is sloppy. Please correct the text confirming the statistical methods employed and if it was the best fit to the analyses performed by the authors. 	
Minor REVISION comments	<ul style="list-style-type: none"> - Change in the text "Hepatitis C virus" for "Hepacivirus C", since it was recently changed by ICTV to a better fit into the genus. - Indicate what commercial kits were employed in the sample collection method. This is an important part of the methodology, since some results might differ depending on the commercial kit. - Suggest to include the topic "Allelic Discrimination plate read and analysis:" together with the genotyping, since is the final step of the genotyping assay methodology; 	
Optional/General comments	The author suggests to the author to try transforming some tables in images, since is most attractive to the readers eyes. I also understand that is difficult to produce images explaining information available in tables, however the effort might result in more views, citations and impact of the work.
