PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments		
Minor REVISION comments	<p>Dear Authors, the paper is interesting anyway I suggest you to revise it as follows:</p> <ul style="list-style-type: none"> - In introduction include informations about hair dyes, paraphenylene di-amine molecule and its effect after ingestion. - In tables 1,2,3 include captions in order to better explain tables content -In table 2 women are separated in groups per age but since several data have been recorded in the questionnaires, in my opinion, it would be interesting to evaluate also some other aspects that may have influenced suicidal decision (i.e. job or familiar issues, economic conditions, stress) and to add new tables according to the most relevant. - Detailed informations about symptoms of hospitalized patients should be included (especially for the ones who needed intensive care) 	
Optional/General comments
