PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	<ul style="list-style-type: none"> Title: according to the scope of the journal. The abstract was revised major because the abstract content was repeated from the introduction, the objectives, case studies and conclusions were not stated, did not include reference sources, the number of words was 200 - 250 words. Introduction : added novelty, the purpose of writing a case study. Revisited case study focus on children or pediatrics? Method: added the sample population used in the case study Results: the results of clinical diagnoses should be displayed in tables and/or pictures to make it easier for the reader to understand. Discussion: there is no discussion, it is recommended to add a discussion about the pathogenesis of COVID-19 in children or pediatrics, epidemiological data for COVID-19 in Libya supported by appropriate reference citations. This is to increase the scientific value. Conclusion: revised because it has not answered the purpose of writing a case study. References: added citations of references in manuscripts that have not been listed (numbers 10 - 17). 	
Minor REVISION comments	<ul style="list-style-type: none"> COVID-19 writing consistency check grammarly (highlight yellow) It is detected that the % similarity is quite high, so it is recommended to paraphrase the sentence to reduce the similarity (green highlight). 	
Optional/General comments	Manuscript needs major revision seriously
