PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	1 I do not find any indication of plagiarism the number of patients, to my opinion, is rather low, some conclusions can be done 3 In the perioperative procedure i would appreciate the use of SEP (Somatosensory evoked potential) and MEP, to assure the neurological outcome and avoid hazards 4 I would like to see more recent references mentioned. There were only 3 from recent years (Masuda et al. from 2018, Koller et al. from 2016 and Berjano &/ Lamartina from 2014) out of 24. 5 To see series of radiological results, especially in the more advanced cases 6 I am rather positive for this publication	
Minor REVISION comments		
Optional/General comments
