PART 1: Review Comments

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Compulsory REVISION comments	I'd change the title. Something like "Comparative study in dexamethasone Could you please add a short description of the procedure (supraclavicular block) In results you may explain the filiation description (weight, sex) and the surgery in both groups, and if the groups were comparable. The multimodal analgesic technique is important too (intravenous opioids, AINE,...)?	
Minor REVISION comments		
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
